### SENSITIVE TOOTH

لأسنان الحساسة

Dentisept: Sensitive is special formulation for pain-sensitive teeth and is optimally suited for the gentle cleaning for sensitive teeth. To be use before or after toothbrushing or in between. The sensitivity to pain of sensitive teeth can be reduced prior to brushing the teeth. Bacterial plaque is also removed in the process on of the main causes for caries and periodontitis. After toothbrushing or in between, sensitive dental rinse inhibits the formation of calculus thus actively preventing inflammation of the gums. Even for very sensible teeth, it may be used several times a day. Ideally suited also for denture wearers.

### BLEEDING SENSITIVE GUM

لنزيف اللثة الحساسة

Dentisept: mouthwash is a medicated ready to use mouthwash for everyday complement of your dental care. Use mouthwash before or after toothbrushing or in between. Before toothbrushing, it removes bacterial plaque after toothbrushing or in between. Mouthwash inhibits the formation of calculus, thus actively preventing inflammation of the gums.

### SENSITIVE TOOTH WITH WHITENING

لأسنان الحساسة مع مبيض

Dentisept: Mouthwash is a medicated ready to use mouthwash which provided extra care for your teeth on a daily basis. Use after brushing to reduce the formation of plaque and retain the natural whiteness of clean teeth. Any discoloration is removed an the tooth enamel is remineralized. For natural strong, white teeth. Also ideal for carriers of dental prostheses - with effective results.

لتنظيف لطيف للأسنان الحساسة

### Tooth Brush (Soft & Medium)

فرشاة (متوسطة & ناعمة) مع منظم للسان

لتنظيف الأسنان الحساسة

The Specially texture at the back of the brush head cleans tongue.

Special cut bristles provide an in-depth cleaning, from nether section of the teeth to the uppermost surface of the gums and help prevent formation of tartar.

### Tooth Brush فرشاة للأسنان

for Kids  
للأطفال

Ensures effective brushing with its top of the brush and special cut shape for children, thanks to its physiognomy conforming to that of mouth interior. Specially rounded tips of nylon 6.12 bristles do not bruise the teeth surface and gum. Ensures effective grip during thanks to its ergonomic handle structure. Suitable for children who still have at school age secondary teeth together with their first teeth.
